URL ANALYSIS

Analyze any suspicious URL

Paste a link to a remote file or webpage. We fetch and analyze it inside a fully isolated sandbox — nothing ever touches your machine.

ENTER URL TO ANALYZE

not-a-valid-url

TRY AGAIN

Scan failed — URL unreachable

We couldn't fetch this URL in our sandbox. This may be because the server is down, the URL is malformed, or access is restricted.

→ Check the URL format. Make sure it starts with http:// or https://

→ Try File Upload instead. If you have the file locally, upload it directly.

→ The site may be down. Try again in a few minutes.
