SUSPICIOUS INDICATORS

H **Suspicious registry modification**
Attempts to modify HKLM\SOFTWARE\Microsoft\Windows\CurrentVersion\Run for persistence.

H **Network beacon detected**
Initiates outbound HTTP connection to 185.234.xx.xx:4444 — known C2 server.

H **Double extension masking**
File uses .pdf.exe naming to disguise executable as a document.

M **Anti-sandbox behavior**
Detects virtualized environment and delays execution by 120 seconds.

L **Entropy anomaly in PE sections**
High entropy detected in .text section — consistent with packed or encrypted payload.
